**Burroughs B 90 Series
The B 92**

Take the Step Up

Compact . . . powerful . . . easy to use . . . and more cost effective than other systems in its size and price range: Burroughs B 92. It's the right move, whether you're taking that first step into computerized operations or a step up to a new level of computer performance and excellence.

Here's why:

It's easy to work with . . .

Flexible and "friendly," the B 92 readily fits your immediate needs *and* your present operation.

- Use current members of your staff to run the B 92: it's so easy to operate they will rapidly become proficient in system use.
- Use the power and capabilities of the B 92 at a single site or distribute them to your remote locations.
- Use the combination of Burroughs standard application solutions you need to achieve results in line with your operating procedures . . . right away.

It's easy to grow with . . .

As your organization grows, Burroughs *Computer Management System* keeps your B 92 in step . . . easily and economically. Disk storage and peripherals can be added to the B 92 without reprogramming, and growth into larger Burroughs systems is accomplished without difficulty.

And provides more results for less investment . . .

The B 92, with Burroughs Super Mini-Disk II, has three times the capacity of other media in its size range. This low-cost, easy to store disk means greater efficiency, faster throughput, and more capacity for your money than ever before. And the B 92's excellent price/performance ratio makes it a sound investment for even the smallest user.

Another plus: your B 92 is backed by Burroughs total system support . . . the expertise of a company with over 90 years experience in information management. From pre-installation guidance and training your staff, to customer service engineering and forms and supplies, Burroughs provides everything a successful installation requires.

See how effectively the B 92 responds to *your* particular requirements. Contact your Burroughs representative today.

Burroughs . . .
total solutions from a single source.
