

iMac offers flash

...

Q Hey, no floppy-disk drive!
Will that be a problem?

A. Possibly. If you depend on floppies, you'll need an external USB removable-disk drive. Unfortunately, no such drives are available.

Oakdale-based Imation has created a \$189 USB SuperDisk drive that reads floppies and 120-megabyte SuperDisks. But the device wasn't released alongside the iMac as Imation had previously promised. It is now slated for a late-August unveiling.
