MOVE CHARACTERS TO RECORD OR GROUP MARK

The "MCM" instruction in the 1401 D3 used with the Q-32 operates in a different fashion than in standard 1401's. Specifically, word marks in the B field are cleared and A field word marks are transferred to the B field. It should be noted that this action is the opposite of normal 1401's.

Although this document contains no classified information it has not been cleared for open publication by the Department of Defense.
