#### SYSTEMS PROGRAMMING LIBRARY SERVICES

## <u>UNIVAC 1005 SOFTWARE</u> (for Dual Address Systems only)

## 1.0 80 Column 1005 Software

Prog. <u>ID</u> 2K258A	Code <u>Type</u> Object	Memory <u>Size(s)</u> 2K	SPLS Library Document UP-4084	<u>Description</u> Assembler program for compiling 80 column 2K 1005 computer coding.				
øø158R	Object	2K or 4K	UP-4088	Program which on the basis of a series of statements provided to it, produces another program which will produce a report or another output of the desired kind. Output cards produced are then assembled to produce a final object program.				
4K 258A	Object	4K	UP-4084	Assembler program for compiling 80 column 4K 1005 computer coding.				
2.0 90 Column 1005 Software								
2K259A	Object	2K	UP-4104	Assembler program for compiling 90 column 2K 1005 computer coding.				
øø059R	Object	2K or 4K	UP-4088	Program which on the basis of a series of statements provided to it, produces another program which will produce a report or another output of the desired kind. Output cards produced are then assembled to produce a final object program.				
4K 259A	Object	4K	UP-4104	Assembler program for compiling 90 column 4K 1005 computer coding.				

NOTE: Program ID is located in column 68-73. Column 70 is revision number.

### 3.0 Assembler Restart Cards -- 80 and 90 Column

Restart cards are provided to restart pass 2 or pass 3 of all configurations of the 1005 Assembler. The proper card should be placed in front of the Assembler load card and normal load procedures followed, to execute the appropriate pass of the Assembler.

#### 4.0 1005 Utility Programs -- 80 and 90 Column

Prog.	<b>C</b> ode	Memory		
ID_	<u>Type</u>	Size(s)	<u>Document</u>	Description
CLEAR 2K	Object	2K	UP-4072.3	Self loading card that clears 2 banks of memory, reads the next card, and starts program execution from column 1 of card 2. (Card 2 must be a load card.)
CLR 2K LOAD	Object	2K	UP-4072.3	Self loading card that clears 2 banks of memory and loads an object program produced by the 1005 Assembler.
2K DUMP	Object	2K	UP-4072.3	Self loading program consisting of 2 cards that dump memory to the printer identifying banks 1 and 2 of storage.
LOAD CARD	Object	ŽK or 4K	UP-4072.3	Self loading card that loads an object program produced by 1005 Assembler without clearing storage.
REPRODUCE	Object	2K or 4K	UP-4072.3	Self loading card that reads card and punches the images read. The cards to be reproduced are placed directly behind the REPRODUCE card in the card read

hopper.

## UNIVAC 1005 SOFTWARE (Contd.)

## 4.0 1005 Utility Programs -- 80 and 90 Column (Contd.)

* SSD  Source 2K or 4K  UP-4072.3  A subroutine for assembly with the User program that will print specified sections of storage depending on worker program communicating with Snap Shot Dump.  CLEAR 4K  Object 4K  UP-4072.3  Self loading card that clears 4 banks of memory, reads the next card, and starts program execution from column 1 of card 2. (Card 2 must be a load card.)  CLR 4K LOAD Object 4K  UP-4072.3  Self loading card that clears 4 banks of memory and		Prog. ID	Code Type	Memory <u>Size(s)</u>	Document	Description
card, punches and prints the images read. The cards to be printed and reproduced are placed directly behind LIST &REPRO card in the card read hopper.  * SSD Source 2K or 4K UP-4072.3 A subroutine for assembly with the User program that will print specified sections of storage depending on worker program communicating with Snap Shot Dump.  CLEAR 4K Object 4K UP-4072.3 Self loading card that clears 4 banks of memory, reads the next card, and starts program execution from column 1 of card 2. (Card 2 must be a load card.)  CLR 4K LOAD Object 4K UP-4072.3 Self loading card that clears 4 banks of memory and loads an object program produced by the 1005 Assembler.  4K DUMP Object 4K UP-4072.3 Self loading program consisting of 2 cards that dump memory to the printer identifying banks 1, 2, 3,		READ & LIST	Object	2K or 4K	UP-4072.3	reads cards and prints the images read. The cards to be read and printed are placed directly behind the
will print specified sections of storage depending on worker program communicating with Snap Shot Dump.  CLEAR 4K Object 4K UP-4072.3 Self loading card that clears 4 banks of memory, reads the next card, and starts program execution from column 1 of card 2. (Card 2 must be a load card.)  CLR 4K LOAD Object 4K UP-4072.3 Self loading card that clears 4 banks of memory and loads an object program produced by the 1005 Assembler.  4K DUMP Object 4K UP-4072.3 Self loading program consisting of 2 cards that dump memory to the printer identifying banks 1, 2, 3,		LIST &REPRO	Object	2K or 4K	UP-4072.3	card, punches and prints the images read. The cards to be printed and reproduced are placed directly behind
the next card, and starts program execution from column 1 of card 2. (Card 2 must be a load card.)  CLR 4K LOAD Object 4K UP-4072.3 Self loading card that clears 4 banks of memory and loads an object program produced by the 1005 Assembler.  4K DUMP Object 4K UP-4072.3 Self loading program consisting of 2 cards that dump memory to the printer identifying banks 1, 2, 3,	*	SSD	Source	2K or 4K	UP-4072.3	will print specified sections of storage depending
